

1st Bi-Annual Congressional Aerospace Policy Retreat

As the aerospace industry embarks on a post-shuttle era, how will the future look and who will shape its direction. In partnership with The George Washington University Space Policy Institute, the Satellite Industry Association, The Space Foundation, and the Space Transportation Association, the American Institute of Aeronautics and Astronautics is hosting a day of panel discussions ranging from the history of space exploration to the dangers of space debris. The Aerospace Policy Retreat is intended to introduce new members of Congress and their staff to the issues, industries, and people that play a crucial role in America's aerospace endeavor and policy.

Tentative Agenda

- History of Space Exploration
- Commercial Satellite Industry— Remote Sensing to Daily Communications
- U.S. Human Spaceflight— What's Next?
- Satellites, UAVs, and National Defense
- Lunch with Charlie Bolden, NASA Administrator *(RSVP Required)*
- International Treaties and Obligations— What are the rules?
- Transformation of the Nation's Air Traffic Management Capabilities and the Next Generation Air Transportation System
- International Partners and U.S. Space Policy
